Exercise 2: HTML

Upload a zip file named `yourName.USPnumber.zip`*, and include the files for the questions.*

1. Upload the HTML pages you created when you followed the HTML5 course from lessons 1-11 and 15-25. You can upload the set of files you created or one file with all the content. On each page, change some names used in the HTML so the page is not exactly the same as the one used in the course (or by other students).

2. Create an HTML page presenting yourself to the rest of the class. It must have:
   a. Paragraphs `<p>`
   b. Links to other pages
   c. Images:
      i. At least 4
      ii. Same width and height
      iii. Some of them must have links too
   d. At least 3 `<div>`s
      i. They should be used in a coherent way to divide your page

Good Luck!
